Create an account

Upon first opening the eero mobile app, you will be prompted to create an eero account through a guided setup process.

Make sure you have the following to get started:

- Mobile device with a data connection. (If you don't have access to a data connection, see our workaround instructions here.)
- At least one eero gateway (the eero Beacon and eero 6 extender can only be added to an existing network).
- Internet service provided into your home.
- · Cable or DSL modem.

• eero mobile app.

1.

Open the eero mobile app and tap the *New to eero?* button.

2.

Log in with your existing Amazon account or create a new eero account with your email or phone.

3.

If creating a new account, enter in the verification code sent via SMS or email.

Network setup

Your gateway is the primary eero device connected to your modem and is needed to establish your network. The eero mobile app will guide you through setting up your eero gateway in the following steps.

1. Tap Start Setup.

Home	Activity	Disco) ver	Settings
	_		-	

1.

From the Home tab, tap the profile or device for which you want to set a schedule.

2. Select Add a Scheduled Pause.

L

3.

Update the schedule name, start time, end time, and frequency for the scheduled pause, then tap Save.

Data Usage

View data usage on your wifi network, including by device or profile.

1.

From the Activity tab, tap Downloaded Data to view the overall wifi data usage.

2.

Tap Show Live Usage to view current wifi data usage.

3. Tap the **S** in the upper left corner to go back.

Speed test

The speed test analyzes the upload and download speeds at your gateway eero.

2. Tap Run Speed Test.

Update password

Easily change your wifi network password as needed.

Software update

Help ensure your wifi network is always up to date.

Note: If there is a software upgrade available for your network, follow these instructions to start the upgrade process.

Manage which notifications you receive in the eero mobile app.

Customize notifications to your liking.

Learn more about eero Built-in performance and compatibility at eero.com/eero-built-in.

eero Built-in

eero built-in

With eero Built-in and select Echo devices, you can add up to 1,000 sq. ft. of coverage to a compatible eero network.

eero Built-in is automatically enabled for new customers who opt into Amazon account linking during eero account creation. If you haven't linked yet, you can link and activate eero Built-in using the steps below.

1.

From the Discover tab, select Amazon Connected Home.

2.

Tap Connect to Amazon and login using your Amazon account. Compatible Echo devices currently on your network, as well as any added later, will automatically extend your wifi.

3.

To manage eero Builtin devices, go to the *Connected Home* menu and toggle select devices on or off.
